

新建Maven项目

下载JUnit4所需jar包

新建BaseTestCase基类

新建实际测试类继承上面的基类

```
<!-- https://mvnrepository.com/artifact/org.springframework/spring-test -->
<dependency>
    <groupId>org.springframework</groupId>
    <artifactId>spring-test</artifactId>
    <version>4.3.13.RELEASE</version>
    <scope>test</scope>
</dependency>
```

```
<!-- https://mvnrepository.com/artifact/junit/junit -->
<dependency>
    <groupId>junit</groupId>
    <artifactId>junit</artifactId>
    <version>4.12</version>
    <scope>test</scope>
</dependency>
```

```
package com.cto.spring_ioc;
```

```
import org.junit.runner.RunWith;
import org.springframework.test.context.ContextConfiguration;
import org.springframework.test.context.junit4.SpringJUnit4ClassRunner;
```

```
import junit.framework.TestCase;
```

```
@RunWith(SpringJUnit4ClassRunner.class)
@ContextConfiguration(locations = "classpath:applicationContext.xml")
public class BaseTestCase extends TestCase{

}
```
